

Daniel Reyes

Queens, NY | daniel.reyes@gmail.com

PROFESSIONAL SUMMARY

MLOps Engineer with strong hands-on skills in LLM infrastructure and AWS. Built production-grade agentic pipelines using LangGraph and Amazon Bedrock during graduate research and a post-graduation role at a Manhattan AI startup. M.S. in Computer Science from Columbia University, completed May 2024.

EXPERIENCE

MLOps Engineer

Mosaic AI (startup) | New York, NY | 2024 – Present

- Builds LangGraph-based multi-agent workflows for enterprise document analysis; deploys on AWS ECS with CI/CD pipelines managed via GitHub Actions.
- Integrated Amazon Bedrock (Claude and Titan models) for summarization and extraction tasks; owns prompt versioning and evaluation pipelines.
- Implements MLOps observability using CloudWatch and custom LLM evaluation metrics; monitors hallucination rates and latency p95.
- Manages Kubernetes clusters for model serving infrastructure; automated blue-green deployments reducing downtime to zero.

Graduate Research Assistant — ML Systems Lab

Columbia University | New York, NY | 2022 – 2024

- Developed RAG pipelines and LLM evaluation benchmarks for academic research on agentic systems.
 - Published paper on LLM observability tooling; built open-source MLflow-based evaluation framework.
-

EDUCATION

M.S. Computer Science, Columbia University, May 2024; B.S. Computer Science, NYU, 2022

SKILLS

AWS (Bedrock, ECS, Lambda, CloudWatch, S3), LangGraph, LangChain, Python, Kubernetes, Docker, GitHub Actions, CI/CD, MLflow, RAG, LLM evaluation, observability, agentic workflows, Generative AI
