PROFESSIONAL SUMMARY

ML Engineer at Bloomberg with 4 years of experience building data pipelines and ML infrastructure in New York's financial sector. Growing hands-on experience with LLM integration via AWS Bedrock and LangChain; strong Python and AWS foundations.

EXPERIENCE

ML Engineer

Bloomberg L.P. | Manhattan, NY | 2022 – Present

- Builds and maintains ML infrastructure for Bloomberg's financial analytics platform on AWS.
- Recently integrated Amazon Bedrock for an internal news summarization feature; building out CI/CD pipeline for prompt versioning.
- Works with LangChain for early-stage agent workflows supporting research tools.
- Manages AWS infrastructure (ECS, Lambda, S3, CloudWatch) for ML model serving.

Software Engineer

Fiserv | Jersey City, NJ | 2021 – 2022

- Backend Python/Java development for financial services APIs on AWS (S3, Lambda, EC2).
 - Maintained CI/CD pipelines using GitHub Actions for microservices deployments.
-

EDUCATION

B.S. Software Engineering, Rutgers University, 2020

SKILLS

Python, AWS (EC2, Lambda, ECS, S3, CloudWatch, Bedrock — learning), LangChain, GitHub Actions, Docker, SQL, scikit-learn, basic MLOps
