PROFESSIONAL SUMMARY

Senior LLMOps Engineer with 7 years of experience building and operating ML and LLM infrastructure on AWS. Deep hands-on expertise with Amazon Bedrock, LangGraph, and CI/CD pipelines for AI systems. Proven record delivering production-grade AI platforms at scale for major media organizations in New York.

EXPERIENCE

Senior LLMOps Engineer

Paramount+ / CBS Interactive | New York, NY | 2021 – Present

- Designed and operates AWS-based LLM infrastructure serving 8 production AI applications across content recommendation, fan engagement, and internal tooling.
- Built CI/CD pipelines for prompt versioning, model deployment, and LangGraph agent graph rollouts using GitHub Actions and AWS CodePipeline.
- Implemented Amazon Bedrock integrations for summarization and personalization features; manages model versioning and automated rollback on SLO breach.
- Built CloudWatch evaluation dashboards tracking hallucination rates, tool-call success, latency p99, and cost-per-request across all LLM systems.
- Manages AWS Secrets Manager, IAM least-privilege policies, and sandboxed agent environments for safe AI-assisted development workflows.

ML Platform Engineer

Viacom / MTV Networks | New York, NY | 2018 – 2021

- Built MLflow-based experiment tracking and model registry for 12 production recommendation models.
 - Deployed and operated SageMaker endpoints serving real-time predictions at 50K+ requests/minute.
 - Implemented Terraform infrastructure-as-code for the ML platform; reduced provisioning time by 70%.
-

EDUCATION

B.S. Computer Science, Columbia University, 2016

SKILLS

AWS (Bedrock, SageMaker, CloudWatch, CodePipeline, Lambda, ECS, Secrets Manager, IAM), LangGraph, LangChain, Python, Docker, Kubernetes, Terraform, GitHub Actions, MLflow, CI/CD, SLO design, observability, infrastructure-as-code
