

Sarah Mitchell

Chicago, IL | sarah.mitchell@emsl.com

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 6 years of deep CI/CD and AWS infrastructure expertise. Strong background in production reliability, Kubernetes, and observability — but experience is in traditional software DevOps, not ML or AI systems. Open to relocating.

EXPERIENCE

Senior DevOps Engineer

Motorola Solutions | Chicago, IL | 2021 – Present

- Manages CI/CD pipelines for firmware and software releases across 200+ microservices using GitHub Actions, Jenkins, and AWS CodePipeline.
- AWS infrastructure management (EC2, ECS, RDS, CloudWatch, Route 53) for SaaS products serving enterprise public safety customers.
- Implemented Terraform IaC and Kubernetes orchestration; achieved 99.95% uptime SLO across production fleet.
- Built CloudWatch monitoring and alerting dashboards; trained 15 engineers on observability best practices.

DevOps Engineer

Zebra Technologies | Chicago, IL | 2019 – 2021

- Automated deployment pipelines reducing deploy cycle time from 4 hours to under 20 minutes.
 - Managed AWS infrastructure for enterprise IoT platform; introduced Docker containerization.
-

EDUCATION

B.S. Computer Engineering, University of Illinois Urbana-Champaign, 2019

SKILLS

AWS (EC2, ECS, RDS, CloudWatch, CodePipeline, Route 53), Kubernetes, Terraform, GitHub Actions, Jenkins, Docker, Python, CI/CD, observability — no ML/LLM experience
